

Engineering Career Jobs in Dubai UAE 2022 || Handsome Salary || 100% Free Hiring Staff

Description

Engineering Career Jobs in Dubai UAE 2022

We are looking for an innovative, dedicated engineer who has a broad and general fascination with the engineering sciences and who follows international engineering trends and technologies. The engineer's responsibilities include defining problems, researching, interpreting, and applying information, developing solutions, and making decisions.

To be successful as an engineer, you should have a firm understanding of math and science, a deep social, economic, and cultural awareness, and an enthusiastic fondness for teamwork. Ideal candidates will display an ability to comprehend complex systems, identify the sources of any problems that arise, and decide on which actions to take to fix them.

Following is an immediate connection to download a CV for Dubai Jobs, on the off chance that you don't have a CV or you need to adjust your CV.

Engineering Career Jobs in Dubai

Daily and Monthly Responsibilities:

- Manage execution and timely completion of engineering projects by analyzing the scope and determining project specifications, establishing testing methods for product investigations, analyzing test programs for adequacy and sequence, examining samples for compliance with requirements, and preparing reports
- Formulate plans with detailed calculations, drawings, diagrams, project specifications, and

budget estimates, and read and interpret precast reinforcement shop drawings, civil grading plans, and structural drawings.

- Maintain system functionality through rigorous testing, identifying ways to improve efficiency and productivity, and providing maintenance and support activities for all existing solutions
- Monitor industry trends and implement appropriate methods to keep production on the cutting edge, while meeting financial goals and providing cost savings
- Utilize software programming for the preparation of technical specifications, user documentation, presentations, and progress and results tracking
- Build professional skills through continued training, education, and networking events

Skills and Qualifications:

- Bachelor's degree in engineering from an ABET-accredited institution
- 7+ years experience as an engineer
- Strong electronic testing and database design capabilities
- Strong understanding of electronic manufacturing processes
- Strong focus on quality control
- The proven innovative approach to electronic systems development

Preferred Qualifications:

- Professional Engineer (PE) certification
- Experience with software development and platform implementation
- Proven ability to analyze and troubleshoot production processes
- Strong project/team management capabilities
