About JAFZA:

We are the leading provider of worldwide smart end-to-end supply chain logistics, enabling the flow of trade across the globe. Our comprehensive range of products and services covers every link of the integrated supply chain – from maritime and inland terminals to marine services and industrial parks as well as technology-driven customer solutions.

We deliver these services through an interconnected global network of 181 business units in 64 countries across six continents, with a significant presence both in high-growth and mature markets. Wherever we operate, we integrate sustainability and responsible corporate citizenship into our activities, striving for a positive contribution to the economies and communities where we live and work.

Our dedicated, diverse and professional team of more than 56,000 employees from 140 nationalities are committed to delivering unrivaled value to our customers and partners. We do this by focusing on mutually beneficial relationships – with governments, shippers, traders, and other stakeholders along the global supply chain – relationships built on a foundation of mutual trust and enduring partnership.

We think ahead, anticipate change and deploy industry-leading digital technology to further broaden our vision to disrupt world trade and create the smartest, most efficient and innovative solutions, while ensuring a positive and sustainable impact on economies, societies and our planet.

#### **QUALIFICATIONS, EXPERIENCE, AND SKILLS:**

- Bachelor in Technology, Engineering, or equivalent (BE/BTech/BS)
- 7 or more years of professional software development, implementation, and operations experience. Of which 2-3 years of clear demonstration of progressive experience in management.
- Strong technical aptitude to lead an engineering team
- Ability to meet challenges under demanding conditions and keep calm under pressure.
- Organized and able to work with many people to deliver product features on a tight schedule
- Proven ability to influence across matrix organizations at various levels.
- Strong experience in managing multiple projects/programs.
- Excellent analytical and interpersonal skills, with the ability to work successfully across all engineering disciplines
- Resourceful – able to deliver results with minimal direction.
- Ability to communicate clearly and effectively with developers, business owners, and senior business leaders
- Solid understanding of developer tools and cloud technologies
- Experience working on frameworks or platforms consumed by a large developer audience
- Well-versed in emerging industry technologies and trends, and the ability to communicate that knowledge to the team and use it to influence product direction.
- Roll-up sleeves attitude, remove obstacles that prevent teams from achieving their goals.
